

Forex rates 1.1 - API 2 - Fintract Global

Introduction

- About

This API uses the GET method. It uses the exchange rates provided by either HSBC or Barclays Bank to convert his or her desired amount to a currency of his choice, with the base currency being Great British Pound.

It also has another terminal, '/fx-rates' which is used to give current exchange rates between Great British Pound and the currency selected by the user.

- Version

Current Version 1.1.

Actions

- Format

URL	Method	Body
/result	GET	Raw: JSON

URL	Method	Body
/fx-rates	GET	Raw: JSON

- Request

URL	Method	Body
/result	GET	{"BAN": "1061234567", "C": "CHF", "amount": "100"}

URL	Method	Body
/fx-rates	GET	{"BAN": "1061234567", "CURRENCY": "CHF"}

- Response

URL	Method	Response
/result	GET	'Your bank is HSBC Bank. The current exchange rate for CHF is 1.01. So, for 100.0 GBP you will get 101.0 CHF'

URL	Method	Body
/fx-rates	GET	'The current exchange rate for GBP/CHF is 1.01.'
